SUSTAINABLE DEVELOPMENT STRATEGY OF

„AGRO-TOP” SP. Z O.O

The aim of this study is to analyze current performances and future business activities of Production and Trading Company “AGRO-TOP” Sp. z o. o. for Corporate Social Responsibility, so the concept, according to which our company voluntarily takes into account environmental protection and social interests in its policies and in dealing with different groups of stakeholders.

The Sustainable Development Strategy of “AGRO-TOP” company is based on three fundamental assumptions:

- determining the basic needs of our employees and anti-discrimination
- current and future needs of the company's development through technological progress without negative affect on the natural resources and the environment
- active support for the interesting and effective solutions in many areas of social life – in education field, culture and sport.

In the era of globalization, development and implementation of sustainable development strategies is a necessity for the “AGRO-TOP” company, which through its activities wants to be seen as a socially responsible company.

PROFILE OF THE COMPANY AND EXAMPLES OF EXISTING ACTIONS IN IMPLEMENTATION OF SUSTAINABLE DEVELOPMENT

Agro-Top is a considerable business partner in the field of animal fats and other animal products. Years of experience in sourcing, melting, production and use of fats have made us an expert in our branch.

The products we manufacture are important raw materials for the food, feeding, pet food, chemical industries as well as for biofuels production. Our customers include many leading companies who are active in the development and manufacture of cutting-edge products, for whom first-class fats are indispensable ingredients.
